## PROFILE INFO

I'm a dedicated Computer Science student with a strong passion for technology, problem-solving, and innovation. I enjoy exploring areas like programming, software development, data structures, and emerging technologies such as AI and Web Development. Currently building my skills through hands-on projects and academic learning. Eager to learn, collaborate, and grow in the tech industry.

## EXPERIENCE

### UMAK: I.T OLYMPICS COMPETITION 2024

- I represented my school in the UMAK I.T. Olympics Quiz Bee, where I competed against other top students in the field of information technology. I'm committed to learning, growing, and contributing to innovative tech solutions.

### HUAWEI ICT COMPETITION 2024-2025 PHILIPPINES

- I've also participated in the Huawei ICT Competition, where I gained valuable experience in real-world tech challenges. I'm eager to keep learning, collaborate with others, and contribute to innovative solutions in the IT field.

### SCHOOL UNIVERSITY THESIS PROJECT

- As part of my academic journey in Computer Science, I've developed and led key thesis projects that address real-world needs. These include:

  **Alumni Information System** – A web-based platform designed to manage and track alumni data, built using PHP, MySQL, HTML, and CSS.
  **Student Competency Profiling System** – A profiling tool developed using PHP that evaluates student strengths and suggests suitable academic or career paths based on multi-criteria analysis and genetic algorithm.

### SYSTEM FREELANCE

- **OJT PORTAL**
- **Optimizing Traffic Congestion Using Genetic Algorithm**
